Company Profile:

FTT Medical Inc. and Electrosurgical Instruments merged in February of 2016. ESI is a 100 year old company specializing in integrating fiberoptic light into surgical instruments. FTT Medical is a component manufacturer and contract manufacturing company providing services to large and small OEM medical device companies. We specialize in machined metal and plastic components, assemblies, and sub-assemblies. We hold ISO 13485 certification and FDA registration.

Products:

- ESI's instruments are of the highest quality in workmanship and functionality of their class. FTT Medical Inc. excels in making challenging components that many companies cannot make. We machine in 3-5 axis platforms on mills and up to 11-axis on our swiss lathes

Objectives(s) at Health Achieve 2016:

- To meet with distributors and/or agents who have a direct presence in hospitals, OR's and surgical centers.
